

# Joint Agency Digital Signage Project

May 22, 2012

## Project Summary

The project is to install a digital signage system within the offices of RSC. The purpose is to improve the communication within the State of Ohio Agencies, which is a common mission. The plan is to ensure that all employees have information available to them regarding goals, mission of agency, news and performance of staff within RSC.

## Project Goal

The goal is for the agency to increase communication within the agency of industry standards, mission and upcoming events in RSC.

## Project Outcome

Provide requirements needed for next phase of project the following deliverables:

1. Consider type of data and location for each unit.
2. Clearly define available products relevant to their needs –define features and functions.

## Project Benefits

This project will benefit the Rehabilitation Service Commission (RSC) by enhancing communication between the agencies.

- Increased awareness within agency,
- Communicate goals and expectations,
- Communicate industry standards and mission of agencies
